

Replaceable striking plate
made of durable nylon
(Available as an accessory).

Santoprene handle for
perfect grip and precision.

Holster made from extra
durable PP plastic. Holes for
better ventilation and easier
identification of size. Can be
attached to a belt, pocket or
a button.

Continuous I-beam forged in one piece for
extremely high breaking capacity and impact
resistance and for better transfer of power into
the object being worked on.

The oval shape of the
handle makes it easier to
remove material.

The entire chisel can be placed flat against the
work surface, meaning that the material can be
removed without damaging the underlying surface.

Blade made from double-
tempered high-quality steel,
perfectly sharpened into a 25°
angle for optimum balance
between sharpness and durability.

SHARP, RELIABLE AND ALWAYS ON HAND.

We decided immediately: our new range of chisels should offer just what professional craftsmen actually need. But we didn't stop there. When we developed our different chisels, we went further than that. The result was not only a series of award-winning chisels that can be likened to handy and durable all-purpose

tools, it was also a brand new series of high quality chisels with a unique design and function. We also decided to develop a brand new type of smart holster that means you can have one or more chisels close by at all times.

EDC CHISELS

When we observed craftsmen at work, it quickly became apparent that they needed a chisel that is easy to carry and can be used for various types of work. This led to Hultafors' EDC chisels - handy chisels with durable blades and sturdy handles that can withstand strong blows from a hammer. The chisels immediately set a new standard and have been awarded both the Red Dot Design Award and the iF Product Design Award.

HDC CHISELS

In our survey, many craftsmen also called for extremely high quality chisels, which were previously absent from the market. We took them at their word and developed the Hultafors HDC Chisel - a unique chisel with a uniform steel construction, forged in a single piece. A highly robust, sharp and durable chisel for craftsmen who want something extra in terms of strength, function and precision.

Chisel HDC

Chisels with perfect precision, sharp, heavy duty, and always close at hand. They are ready for tasks requiring extreme strength and precision. A perfect ground blade, bevelled at 25° for the best possible ratio of sharpness and durability. The entire chisel including the handle can be positioned flat against the surface for more uses. Smart holster made from durable PP plastic for increased accessibility, the holster can easily be attached to a belt or on a button.

- Forged in one piece with an I-beam for extreme durability and to maximize the force transmission down to the work piece.
- Flat contact surface gives an increased number of applications.
- Santoprene handle, optimized for both power and precision.
- Smart holster for increased availability.
- Replaceable nylon striker available as spare part.

Ref. no.	Model	Blade width	Total length	Spare striker	Qty/pack
