

NEW KNIVES FOR BUSHCRAFT ENTHUSIASTS

Developed in close dialogue with experienced users by listened to their needs and requests for tools to be used for off-line, screen-free activities in the great outdoors.

JAPANESE STEEL WITH SCANDI GRIND FOR LONGLASTING SHARPNESS

The two Outdoor knives from Hultafors, the OK4 and OK1, both come in 3 mm thick Japanese knife steel with a Scandi grind for longlasting sharpness. A black EPD-coating (electrophoretic deposition) protects the 93 mm long blade from rust, and the grinded spine of the blade is designed for starting a fire with a fire starter. The long tang (82 mm) also makes these knives suitable for batoning.

OUTDOOR KNIFE OK4

A durable outdoor knife with a Santoprene friction grip suitable for tough tasks in the field. The hardwearing textile beltloop allows up to 80mm wide belts and is equipped with a pocket for a fire starter.
